How We Keep Your Information Safe

First Atlantic FEDERAL CREDIT UNION

Protecting your personal and financial information is one of our highest priorities. We use a combination of advanced technology, strict policies, and trusted partnerships to ensure your data always remains secure.

STRONG DATA ENCRYPTION

We safeguard sensitive information using industry-standard encryption methods. This means your data is transformed into a secure format that can only be accessed by authorized systems. In addition, all backup data is encrypted, ensuring that even in the event of an unexpected incident, your information remains protected and inaccessible to unauthorized parties.

SECURE DATA BACKUPS

We maintain secure, encrypted backups of critical data to ensure business continuity and rapid recovery if needed. These backups are regularly monitored and managed according to best practices, helping us protect against data loss while maintaining strict confidentiality.

TRUSTED THIRD-PARTY SECURITY

We partner with a reputable core financial processor that undergoes rigorous security evaluations. We actively verify and review their security controls to ensure they meet high standards for protecting member data. This includes ongoing assessments of their compliance, infrastructure security, and data protection practices.

CONTINUOUS OVERSIGHT

Security isn't a one-time effort—it's an ongoing commitment. We continuously monitor our systems, review security practices, and update our safeguards to stay ahead of evolving threats.

Your trust matters to us. We are committed to protecting your information with the same level of care and diligence that we would expect for our own data protection.
